

## Addition

Your task here is a straight-forward one: you are to write a program that takes two numbers and adds them together.

### Input

The input will consist of the two integers  $a$  and  $b$  separated by a single space. It is guaranteed that  $0 \leq a, b \leq 1\,000\,000\,000$ .

We strongly recommend using the solution templates provided below. These templates will ensure that you handle the input and output correctly.

### Output

Your output should consist of a single integer, the sum of  $a$  and  $b$ .

### Sample Input 1

23 45

### Sample Output 1

68
